RIVER FOWEY LOSTWITHIEL BRIDGE

The river was first bridged by the Normans, who founded Lostwithiel.
"The Great Bridge of Lostwithiel" first documented in 1280, had nine arches. The foundations of the four most westerly arches are said to be under North Street.
The bridge has undergone changes over the centuries and was rebuilt in the 19th Century. It narrowly escaped being blown up by the Parliamentarian Army in 1644 during the English Civil War.

Over time the river has changed course and the four easterly arches (those nearest the railway) were added in the 18th Century.

Until the bypass was opened in 1939 this bridge was the main road between St Austell and Liskeard. Today it still plays a major role in the life of Lostwithiel as a central part of town activities and celebrations.
